Education

University of Waterloo, BMath, 4.0 GPA Sept 2025 – May 2030

Experience

Intern, Downtown Dartmouth Business Commision June 2025 – Aug 2025

- Initiated partnership with Unwaste.io as testers on behalf of the organization, leading to a smooth release
- Represented the organization at the 2025 Natal Day and Pride parades
- Found optimal routes for litter picking around Dartmouth using a heatmap

Lead Designer, Minecraft Marketplace – SolidBlocks October 2024 – March 2025

- Led development of 3 major projects which generated over \$15000 in revenue
- Created and implemented over 50 3D models
- Created a style guide for other designers to streamline design process

Game Developer, Ripple Studio – Darza's Dominion June 2023 – May 2024

- Led design of 4 dungeons, leading to a peak active player count of 1200
- Created 100+ enemy designs and behaviors
- Experimented with new network architecture to half packet size

Projects

kingdomcrushers.io Read blog

- Solo built a cross platform MMO with 1000+ hours of playtime across 300 accounts
- Founded a studio and published on the Play Store, generating over \$300 dollars in the first month
- Optimized server to support hundreds of concurrent players on a \$20 DigitalOcean VM
- Godot, Golang

OSRS Flipper Read blog

- Built a Runescape market manipulating bot with a 0% ban rate
- Consistently achieved 10% returns over an hour of flipping
- Created algorithm to price flips with the same results as the OSRS Exchange
- Python, Java

Quizzgen Read blog

- Built a Duolingo inspired quiz generating startup
- Implemented secure accounts and payments with OAuth and Stripe
- Smart design to minimize network overhead (read blog)
- Typescript React

Favorite Tools
